To whom it may concern

We have an ornamental cherry tree in our front garden, which is getting on in years and was in need of re-shaping and tidying up.

We employed Craig Ryan to do the job for us. He took a considerable amount of care in trimming the tree, and we were delighted with the results. The tree is now a far better shape and has lost the overhang that had concerned us when driving onto our drive. It has subsequently flowered well and even fruited, which is not what we expected from an ornamental tree.

At the same time, he removed a small, unwanted coniferous tree. He did all this work without leaving any residue or mess in the front garden and in our opinion it was a thoroughly professional job. We would be happy to recommend him to our friends and to employ him again.
